Hi all

New update about CST license:

For research license, use: 27017@bu-licence11

For teaching license, use: 27000@bu-licence10

For most of you, please point to research license, as teaching license has mesh number limits.

James

Subject: CST license server info updated.

Hi all,

For those using CST for the project, CST 2026 has now been installed on our group computing server.

Please note that the **new license server** is:

bu-licence10@27000

(*spelling is "licence", not "license"*)

If you see a license error when launching CST 2023 or CST 2026, update the license server settings to the address above.

James
